

**RAILROAD COMMISSION OF TEXAS
OIL AND GAS DIVISION**

**CASE NO. 0207685
DISTRICT 6**

APPLICATION OF VALENCE OPERATING COMPANY FOR AN EXCEPTION TO STATEWIDE RULE 37 TO AUTHORIZE DRILLING OF ITS WELL NO. 2, MOBLEY UNIT, BLOCKER (COTTON VALLEY), BLOCKER (TRAVIS PEAK), BLOCKER (PAGE), BLOCKER (RODESSA), SHADY LANE (RODESSA), AND WILDCAT FIELDS, HARRISON COUNTY, TEXAS.

FINAL ORDER

The Commission finds that, after statutory notice in the above-numbered docket, heard on June 14, 1995, the examiners have made and filed a report and proposal for decision containing findings of fact and conclusions of law, which was served on all parties of record, and that this proceeding was duly submitted to the Railroad Commission of Texas at conference held in its offices in Austin, Texas.

The Commission, after review and due consideration of the proposal for decision and the findings of fact and conclusions of law contained therein, and any exceptions and replies thereto, hereby adopts as its own the findings of fact and conclusions of law contained therein, and incorporates said findings of fact and conclusions of law as if fully set out and separately stated herein.

Therefore, it is **ORDERED** by the Railroad Commission of Texas that the application of Valence Operating Company for a spacing exception permit under the provisions of Statewide Rule 37 to complete Well No. 2, Mobley Unit, containing 677.04666 acres of land in the J. Payne Survey, Abstract No. A-543, in the Blocker (Cotton Valley) Field, Harrison County, being 5 miles in a south-southwesterly direction from Marshall, Texas, as shown by a plat submitted with the application, be and is hereby, **APPROVED**; and applicant is granted permission to complete Well No. 2, which is located as described, in the Blocker (Cotton Valley), Blocker (Travis Peak), Blocker (Page), Blocker (Rodessa), Shady Lane (Rodessa), and Wildcat Fields, subject to the conditions listed below:

LOCATION

584 feet FNEL and 1100 feet FSEL of the unit
584 feet FN'lyNEL and 1350 feet FN'lySEL of the survey

CONDITIONS

1. **Fresh Water Sand Protection.** The operator must set and cement sufficient surface casing to protect all usable-quality water as defined by the Texas Water Commission. Before drilling a well, the operator must obtain a letter from the Texas Water Commission stating the depth to which water needs protection. Write: Texas Water Commission, Surface Casing, P. O. Box 13087, Capitol Station, Austin, Texas 78711-3087. File a copy of the Water Commission letter with the appropriate district office.

2. **Permit at Drilling Site.** A copy of the Form W-1 (Drilling Permit Application), the location plat, a copy of Statewide Rule 13 alternate surface casing setting depth approval from the district office, if applicable, and this drilling permit must be kept at the permitted well site throughout the drilling operations.
3. **Notification of Setting Casing.** The operator **MUST** call in notification to the appropriate district office a minimum of eight (8) hours prior to the setting of surface casing, intermediate casing, **AND** production casing. The individual giving notification **MUST** be able to advise the district office of the docket number.
4. **Producing Well.** Statewide Rule 16 requires that the operator submit a Form W-2 (oil well) or Form G-1 (gas well) to the appropriate Commission district office within thirty (30) days after completion of such well. Completion of the well in a field authorized by this order voids the order for all other fields included in the order unless the operator indicates on the initial completion report that the well is to be a dual or multiple completion and promptly submits an application for multiple completion. All zones are required to be completed before the expiration date of this order.
5. **Dry or Noncommercial Hole.** Statewide Rule 14(b)(2) prohibits suspension of operations on each dry or noncommercial well without plugging unless the hole is cased and the casing is cemented in compliance with Commission rules. If properly cased, Statewide Rule 14(b)(2) requires that plugging operations must begin within a period of one (1) year after drilling or operations have ceased. Plugging operations must proceed with due diligence until completed. An extension to the one year plugging requirement may be granted under the provisions stated in Statewide Rule 14(b)(2).
6. **Intention to Plug.** The operator must file a Form W-3A (Notice of Intention to Plug and Abandon) with the district office at least five (5) days prior to beginning plugging operations. If, however, a drilling rig is already at work on location and ready to begin plugging operations, the district director or the director's delegate may waive this requirement upon request, and verbally approve the proposed plugging procedures.
7. **Notification of Plugging a Dry Hole.** The operator **MUST** call to notify the appropriate district office a minimum of four (4) hours prior to beginning plugging operations. The individual giving notification **MUST** be able to advise the district office of the docket number and all water protection depths for that location as stated in the Water Commission letter.
8. **Plugged Wells.** Should this well ever be plugged and abandoned, the Commission will consider such plugging and abandonment as prima facie evidence that production from said well is no longer necessary to prevent confiscation of applicant's property or to prevent waste; and upon such plugging and abandonment, the authority for such well as granted under this permit shall cease.

9. **Permit Expiration.** This permit expires two (2) years from the date this order becomes administratively final, unless actual drilling operations have begun. The permit period will not be extended.

Each exception to the examiners' proposal for decision not expressly granted herein is overruled. All requested findings of fact and conclusions of law which are not expressly adopted herein are denied. All pending motions and requests for relief not previously granted or granted herein are denied.

It is further **ORDERED** by the Commission that this order shall not be final until 20 days after it is actually mailed to the parties by the Commission; provided that if a motion for rehearing of application is filed by any party at interest within such 20-day period, this order shall not become final until such motion is overruled, or if such motion is granted, this order shall be subject to further action by the Commission.

Done this _____ day of October, 1995.

ORDER NUNC PRO TUNC

In conference at its office in Austin, Texas the Railroad Commission of Texas took up for consideration the matter of correcting its Final Order entered on October 17, 1995 in Rule 37 Case No. 0207685. The Commission finds that, due to clerical error, the Final Order in Case No. 0207685 referred to the "Mobley Unit," rather than the "Mobley Gas Unit."

Accordingly, it is ORDERED that the Final Order in Rule 37 Case No. 0207685 be, and the same is hereby, amended *nunc pro tunc* so that each reference in that order to the "Mobley Unit" shall now be a reference to the "Mobley Gas Unit."

Done this 27th day of February, 1996.
